25X1 1. North Korean radio stations include the following:			
	a. Pyongyong ronge of 30 kilometers.		
•	b. Chongjin (129-49, 41-46) 15 kilometer range, local broadcasts only.		
	c. Hamhung (127-32, 39-54) 15 ki	ilometer range, local broadcasts only.	
	d. Wonsan (127-26, 39-10) 15 kil devices; Seoul broadcasts cannot	lometer range, equipped with jamming t be heard in this station's range.	
1	e. Chorwon (127-12, 38-14).	Document No. 2	
	f. Songjin (129-12, 40-40).	No Change in Sings D	
	g. Sinuîju (124-24, 40-06).	Class. Changed To: YS S C Auth.: HR 70-2	
	h. Haeju (125-42. 38-02).	Datos \$3 une 78 25X1	
2.	At the end of the war, the Soviet army removed many radio receivers from North Korea and Manchuria, and listening to the radio was then strictly prohibited. After the establishment of propaganda and regular administrative organizations, radio reception was again allowed and receivers were brought into North Korea by repatriates returning from Manchuria. Listening was supposed to be limited to approved broadcasts, however. Although there were strict penalties for listening to South Korean or American stations, many persons secretly received foreign programs.		
3.	Telephone service in North Korea is limited in most cities and rural districts because of unrepaired damage done to installations in the fighting just before the surrender, lack of spare parts for repairs, and general business depression. In Chongjin, for example, only government offices are equipped with telephones; private telephones are almost non-existent. There and in other cities, many

people engaged in commerce who were formerly the main telephone subscribers have sold their telephones. The demand for such equipment was so slight that the telephones were sold at low prices and many were exported to South Korea. Spare parts are hard to obtain, although batteries of inferior quality are manufactured in Pyongyang. Batteries and other parts are imported from Japan, Hong Kong and South Korea.
